

THE OIL PRICE CRASH AND THE SHIFTING ENERGY LANDSCAPE

Oil prices have dropped and energy available from carbon fuels is abundant. Is this sustainable and what are the forces impacting price and supply as we go forward? What policy issues, and opportunities, are presented by this dramatic change in price of a fundamental input to our economy? Are there actions we should take to shape the economic, security and environmental consequences of lower oil prices? Join the experts from Columbia University as we explore these key questions.
